1. WELCOME TO HAMILTON COURT

We are passionate about helping businesses of all shapes and sizes understand and mitigate the foreign exchange risks they face. Over the last 12 years we have expanded our geographical footprint and increased the products and services that we offer. We are excited about what the future holds. All of this is possible because of the trust our clients place in us. We repay that trust at every opportunity by being fully focused on delivering outcomes that benefit their business.

1. WELCOME

Hamilton Court is authorised and regulated in the UK and Europe to provide bespoke Treasury Management services and registered in Canada as a Foreign Money Service Business, ensuring we uphold the highest standards of best practice and client care.

From our founding days, Hamilton Court has always strived to put clients first and we endeavour to seek the best outcomes for our clients at every opportunity. We remain one of the last truly independent brokerages in the industry.

2. COVERAGE

Regulators

UK: Financial Conduct Authority FRN 810625 / FRN 810631
ITALY: SIM CONSOB 306, PAY Bank of Italy 103
CANADA: FINTRAC M21048900
SPAIN: CNMV 162
LUXEMBOURG: CSSF

3. OUR PRODUCTS & SERVICES

“Hamilton Court are our long-term FX partners. The advice and guidance they’ve given to our business as it continues to evolve and grow is valued by all. They work with stakeholders across the group to ensure that our hedging and cashflow requirements are met and regularly review our policies and procedures to ensure they fit the changing shape of our business.”

3. OUR PRODUCTS & SERVICES

Hamilton Court offers an unrivalled range of FX hedging solutions, along with a dedicated team of regulated professionals who provide bespoke solutions for our clients’ needs. In doing so, we help our clients navigate FX market volatility by utilising a range of products from simple hedging strategies to regulated structured products.

Supporting our clients and building longstanding partnerships has always been at the forefront of what we do. Our team of Dealers work with clients to assess specific requirements, manage risk, and implement effective solutions. Our clients are also supported in the knowledge that their named Dealer will always be on hand to provide them with the latest in fundamental data and technical analysis to keep them updated on all their requirements.

Our proprietary technological infrastructure also enables us to deliver meaningful value in streamlining the execution of trades, settlements, and reporting.

Spot

Through our trading desk and in-house settlements team, we have round-the-clock abilities to execute spot trades in multiple currencies. Whether you need a trade to settle for the start of the session in Singapore or Sweden, or the close of play in Canada or China, your dedicated Dealer will keep you up-to-date on the latest fundamental data and technical analysis for all your requirements.

Our extensive panel of liquidity providers also ensures access to competitive pricing across major, minor, and exotic pairs.

Forwards

Whether you are looking to lock in a rate of exchange, hedge balance sheets or cashflow requirements up to five years out, our team focuses on developing a deep understanding of your needs to mitigate against market risk.

Our credit capabilities also enable our clients to better optimise their cashflow, helping you and your business to allocate resources to where they are needed.

Swaps

Hamilton Court offers the advice, guidance and infrastructure to meet your swap requirements. Be that short dated or five year forwards, rolling swaps to hedge portfolios, or a one-off trade to manage a liquidity mis-match, our team will work with you to ensure an effective solution is delivered.

Limit Orders

Limit orders are a useful way of targeting higher rates of exchange. Through analysing trends and upcoming data points, we provide the advice, guidance and support for clients to place instructions that trigger contracts if levels are reached. This enables clients to take advantage of upside moves which may be temporary or occur outside of standard working hours. Hence, whether at the start of the ASX opening bell session or at the end of the NYSE closing bell, we continually work orders 24/7 which aim to maximise value for you and your business.

Structured Products

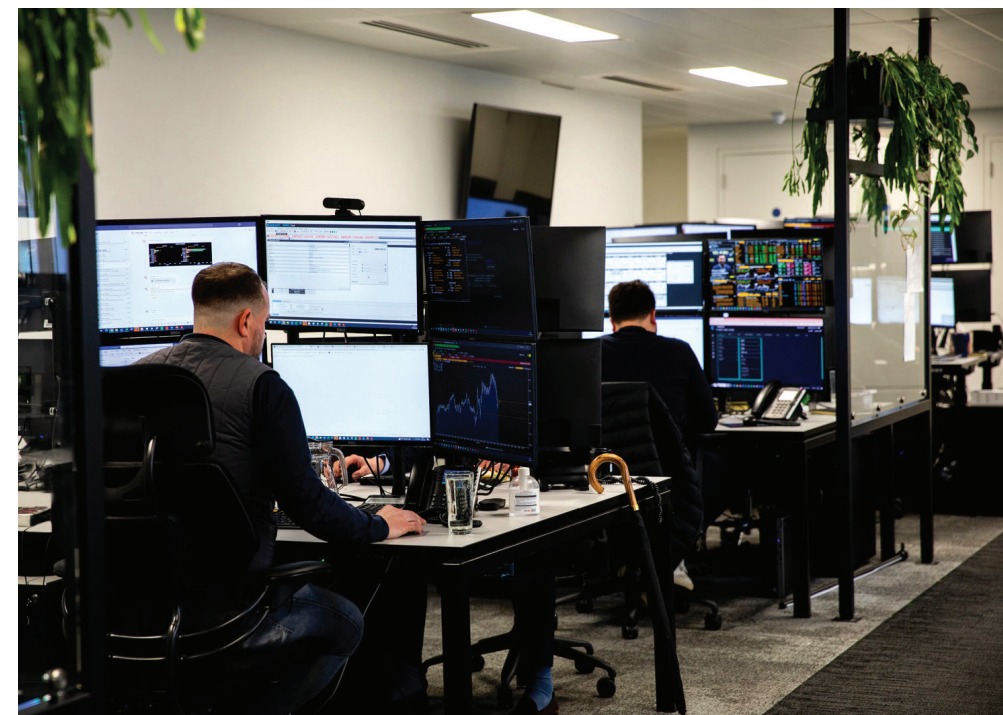

Our regulated structured products desk provides clients with a market-leading range of options and derivative structures to mitigate downside foreign exchange risk and participate in favourable market movements, or alternatively, outperform the current spot or equivalent forward rate.

Our team combines our wealth of product knowledge with client requirements to provide an unrivalled service, from idea generation to stress testing, evaluation and execution. With the broadest product suite in the FX brokerage market, we have you covered.

Treasury Policies

Working alongside treasury, finance and risk teams, Hamilton Court deliver robust and workable treasury policies for organisations of all shapes and sizes. A good policy allows for quick, structured decision making with known parameters to work within and escalation processes where required, which in turn creates bandwidth and facilitates progress. An ill thought-out policy increases the risk of constraining a business with bureaucracy and analysis paralysis. We take the time and use our deep expertise to ensure the trades you are entering into are fit for purpose and meet the regulatory requirements and operational resources of your business.

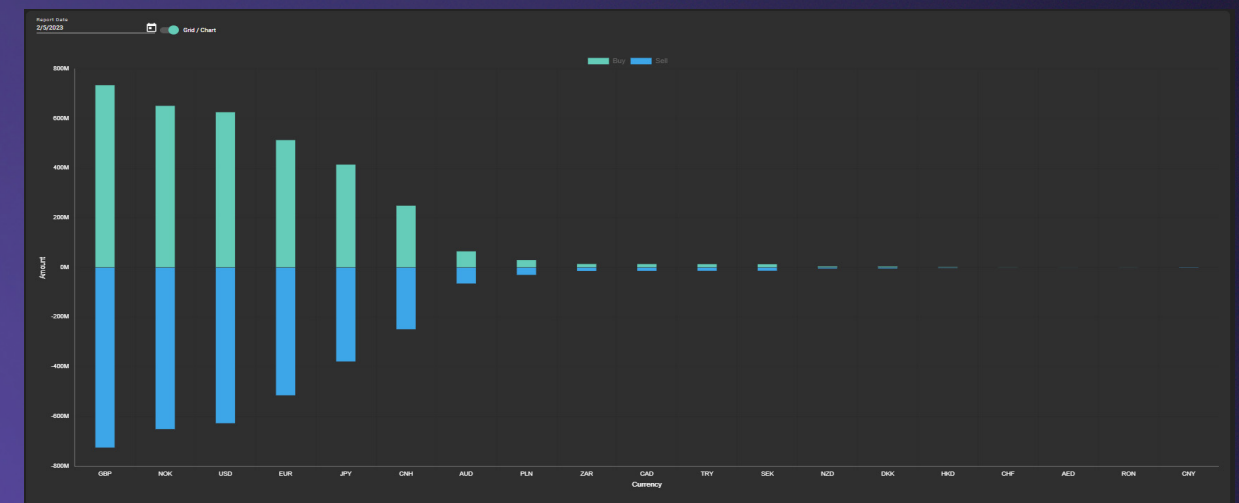

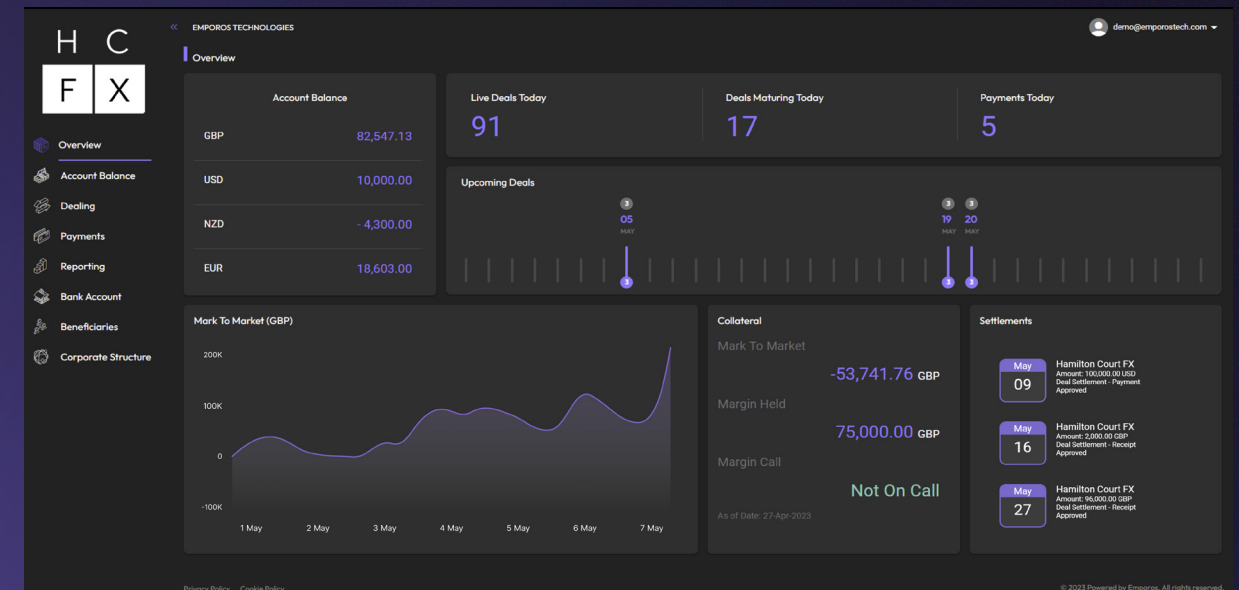

Institutional

Whether our clients are structuring the hedge of an underlying asset, coordinating management fee income, or planning for a multi-year divestment, our team will be right alongside them to offer an effective solution.

We work closely with clients across private debt, private equity, infrastructure, venture capital, and real estate to ensure that our offering is aligned to the needs of the investment community. Our wide range of bespoke solutions and dedicated team mean that you can remain focused on the needs of your investors.

4. TECHNOLOGY

Hamilton Court services its clients with a true blend of personalised client service and a powerful modern technology engine. Our technology platform is powered by Emporos™. A single unified framework which takes you on a complete journey from pre-trade analysis to settlement and accounting.

We are constantly investing in the technology we offer our clients and this a key part of our evolution of excellent service.

5. SECURITY

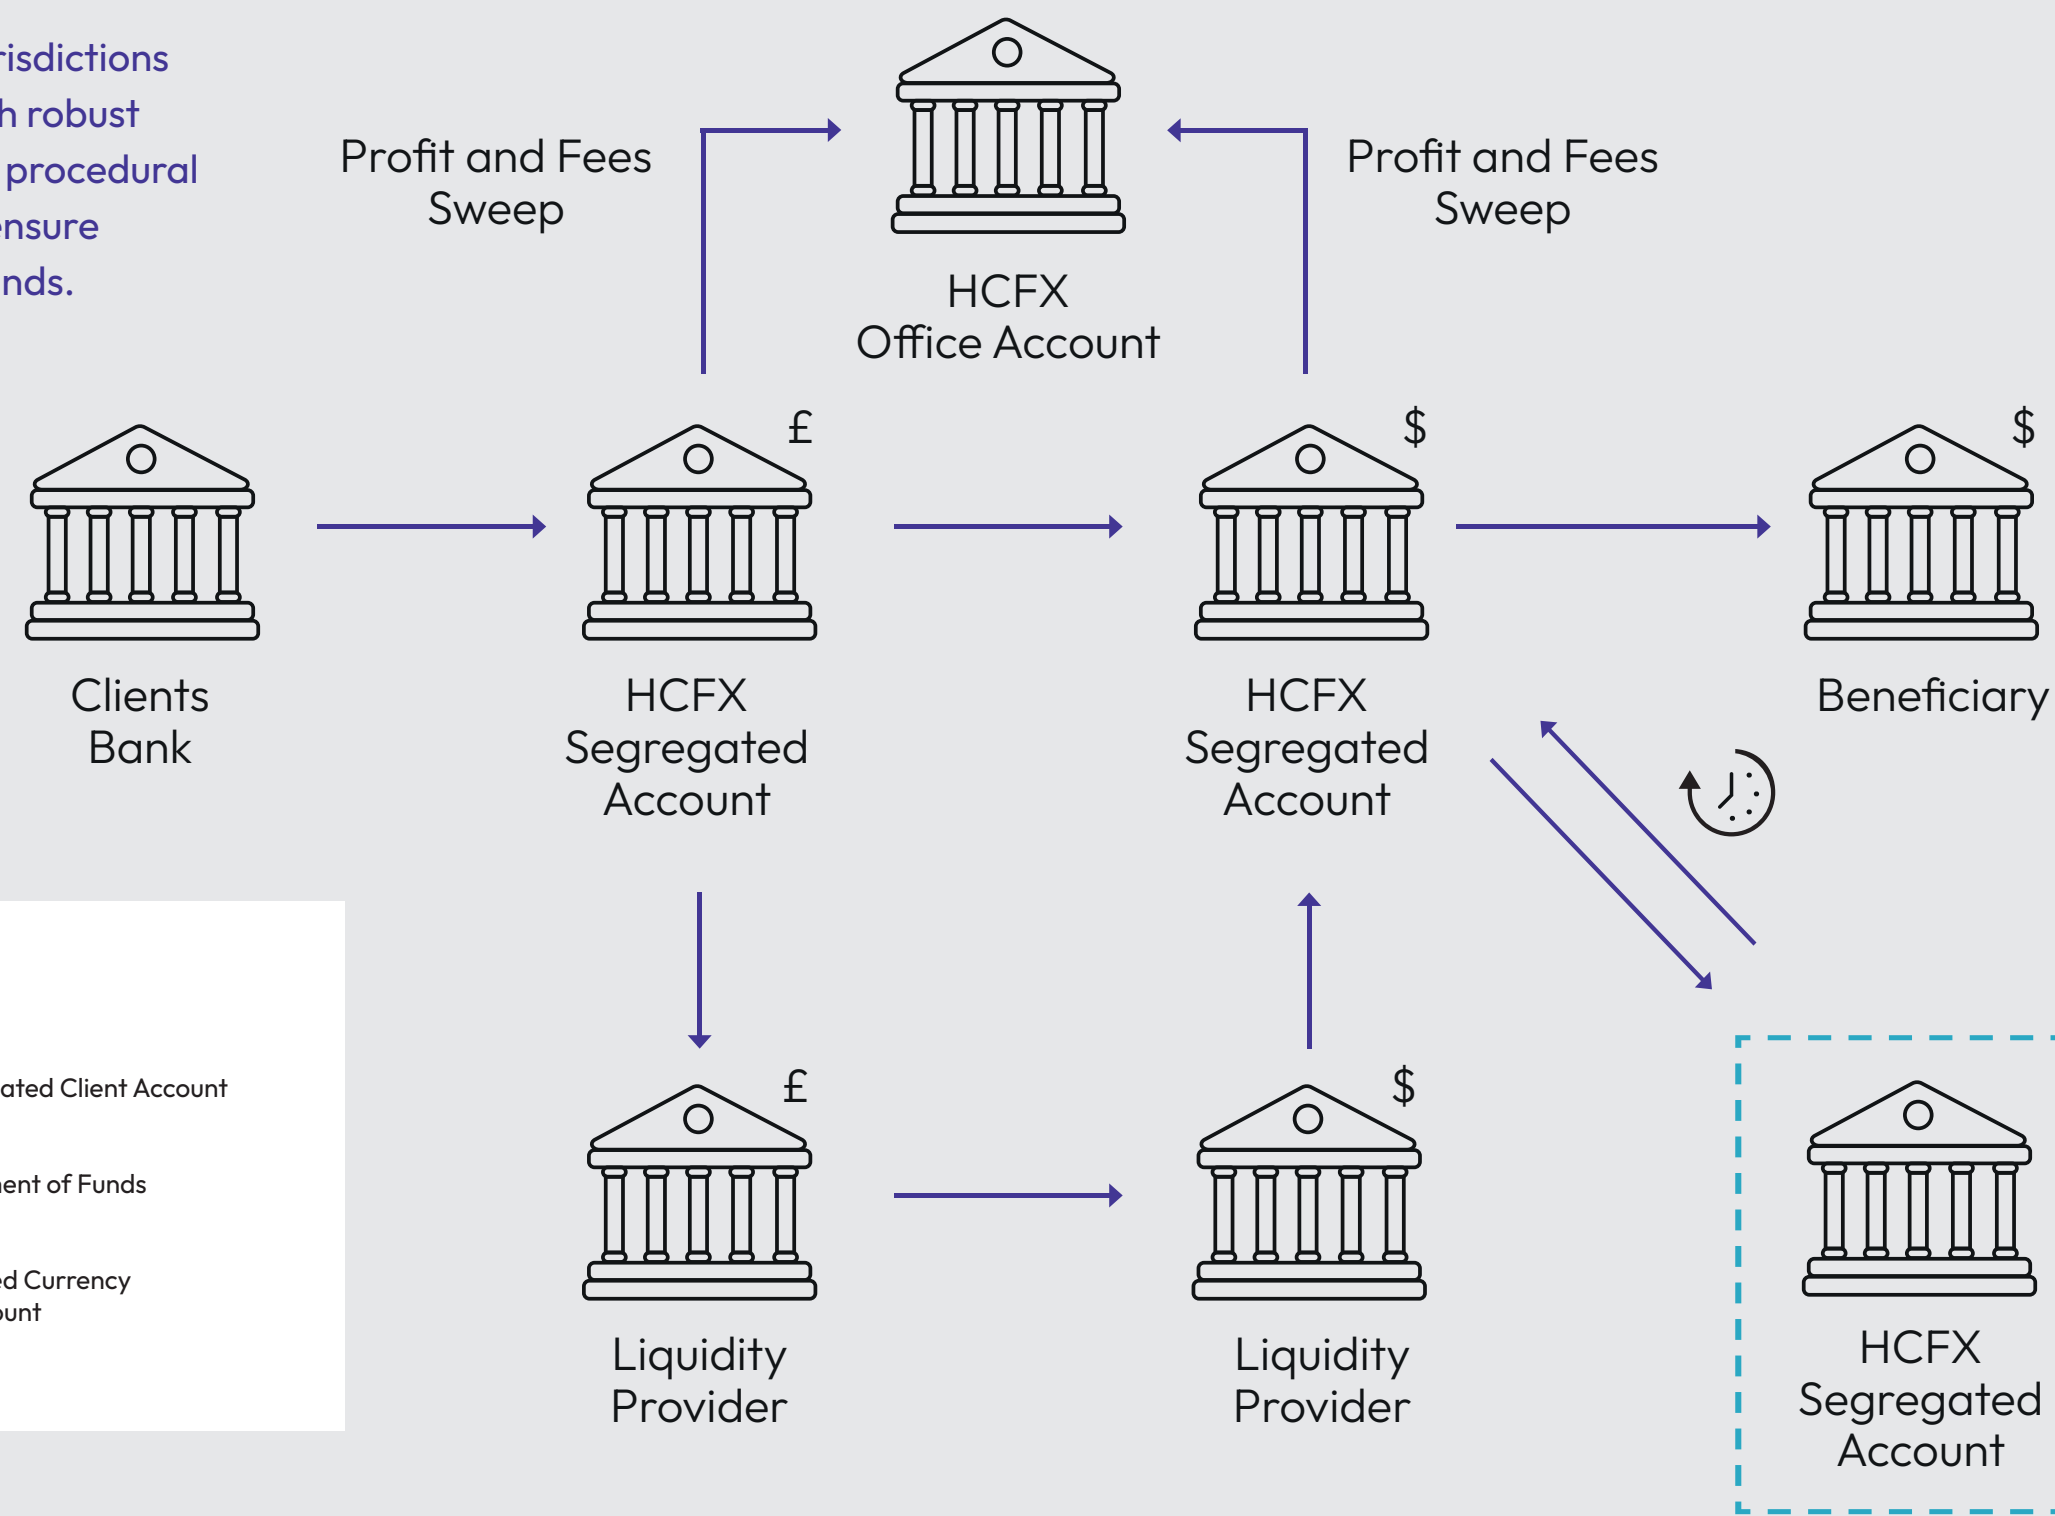

“ I have worked with Hamilton Court for over 6 years covering two companies in different sectors. There are a lot of options in the FX space but I have found that Hamilton Court offer speed, reliability and competitive pricing. They also offer advice and have frequently provided hedging solutions that are not available from mainstream providers. I value their input and the personal touch which you receive on every trade. I wouldn't hesitate to recommend them to my treasury peers.”

Hamilton Court was built on the principles of delivering good outcomes for clients and acting in their interests. Our regulatory landscape is increasingly emphasising this approach and we are glad that they are. For us, it's in our DNA...

FUNDS FLOW

Regulated in all jurisdictions we operate in, with robust technological and procedural infrastructure to ensure security of your funds.

Legend

-  Segregated Client Account
-  Movement of Funds
-  Denoted Currency of Account

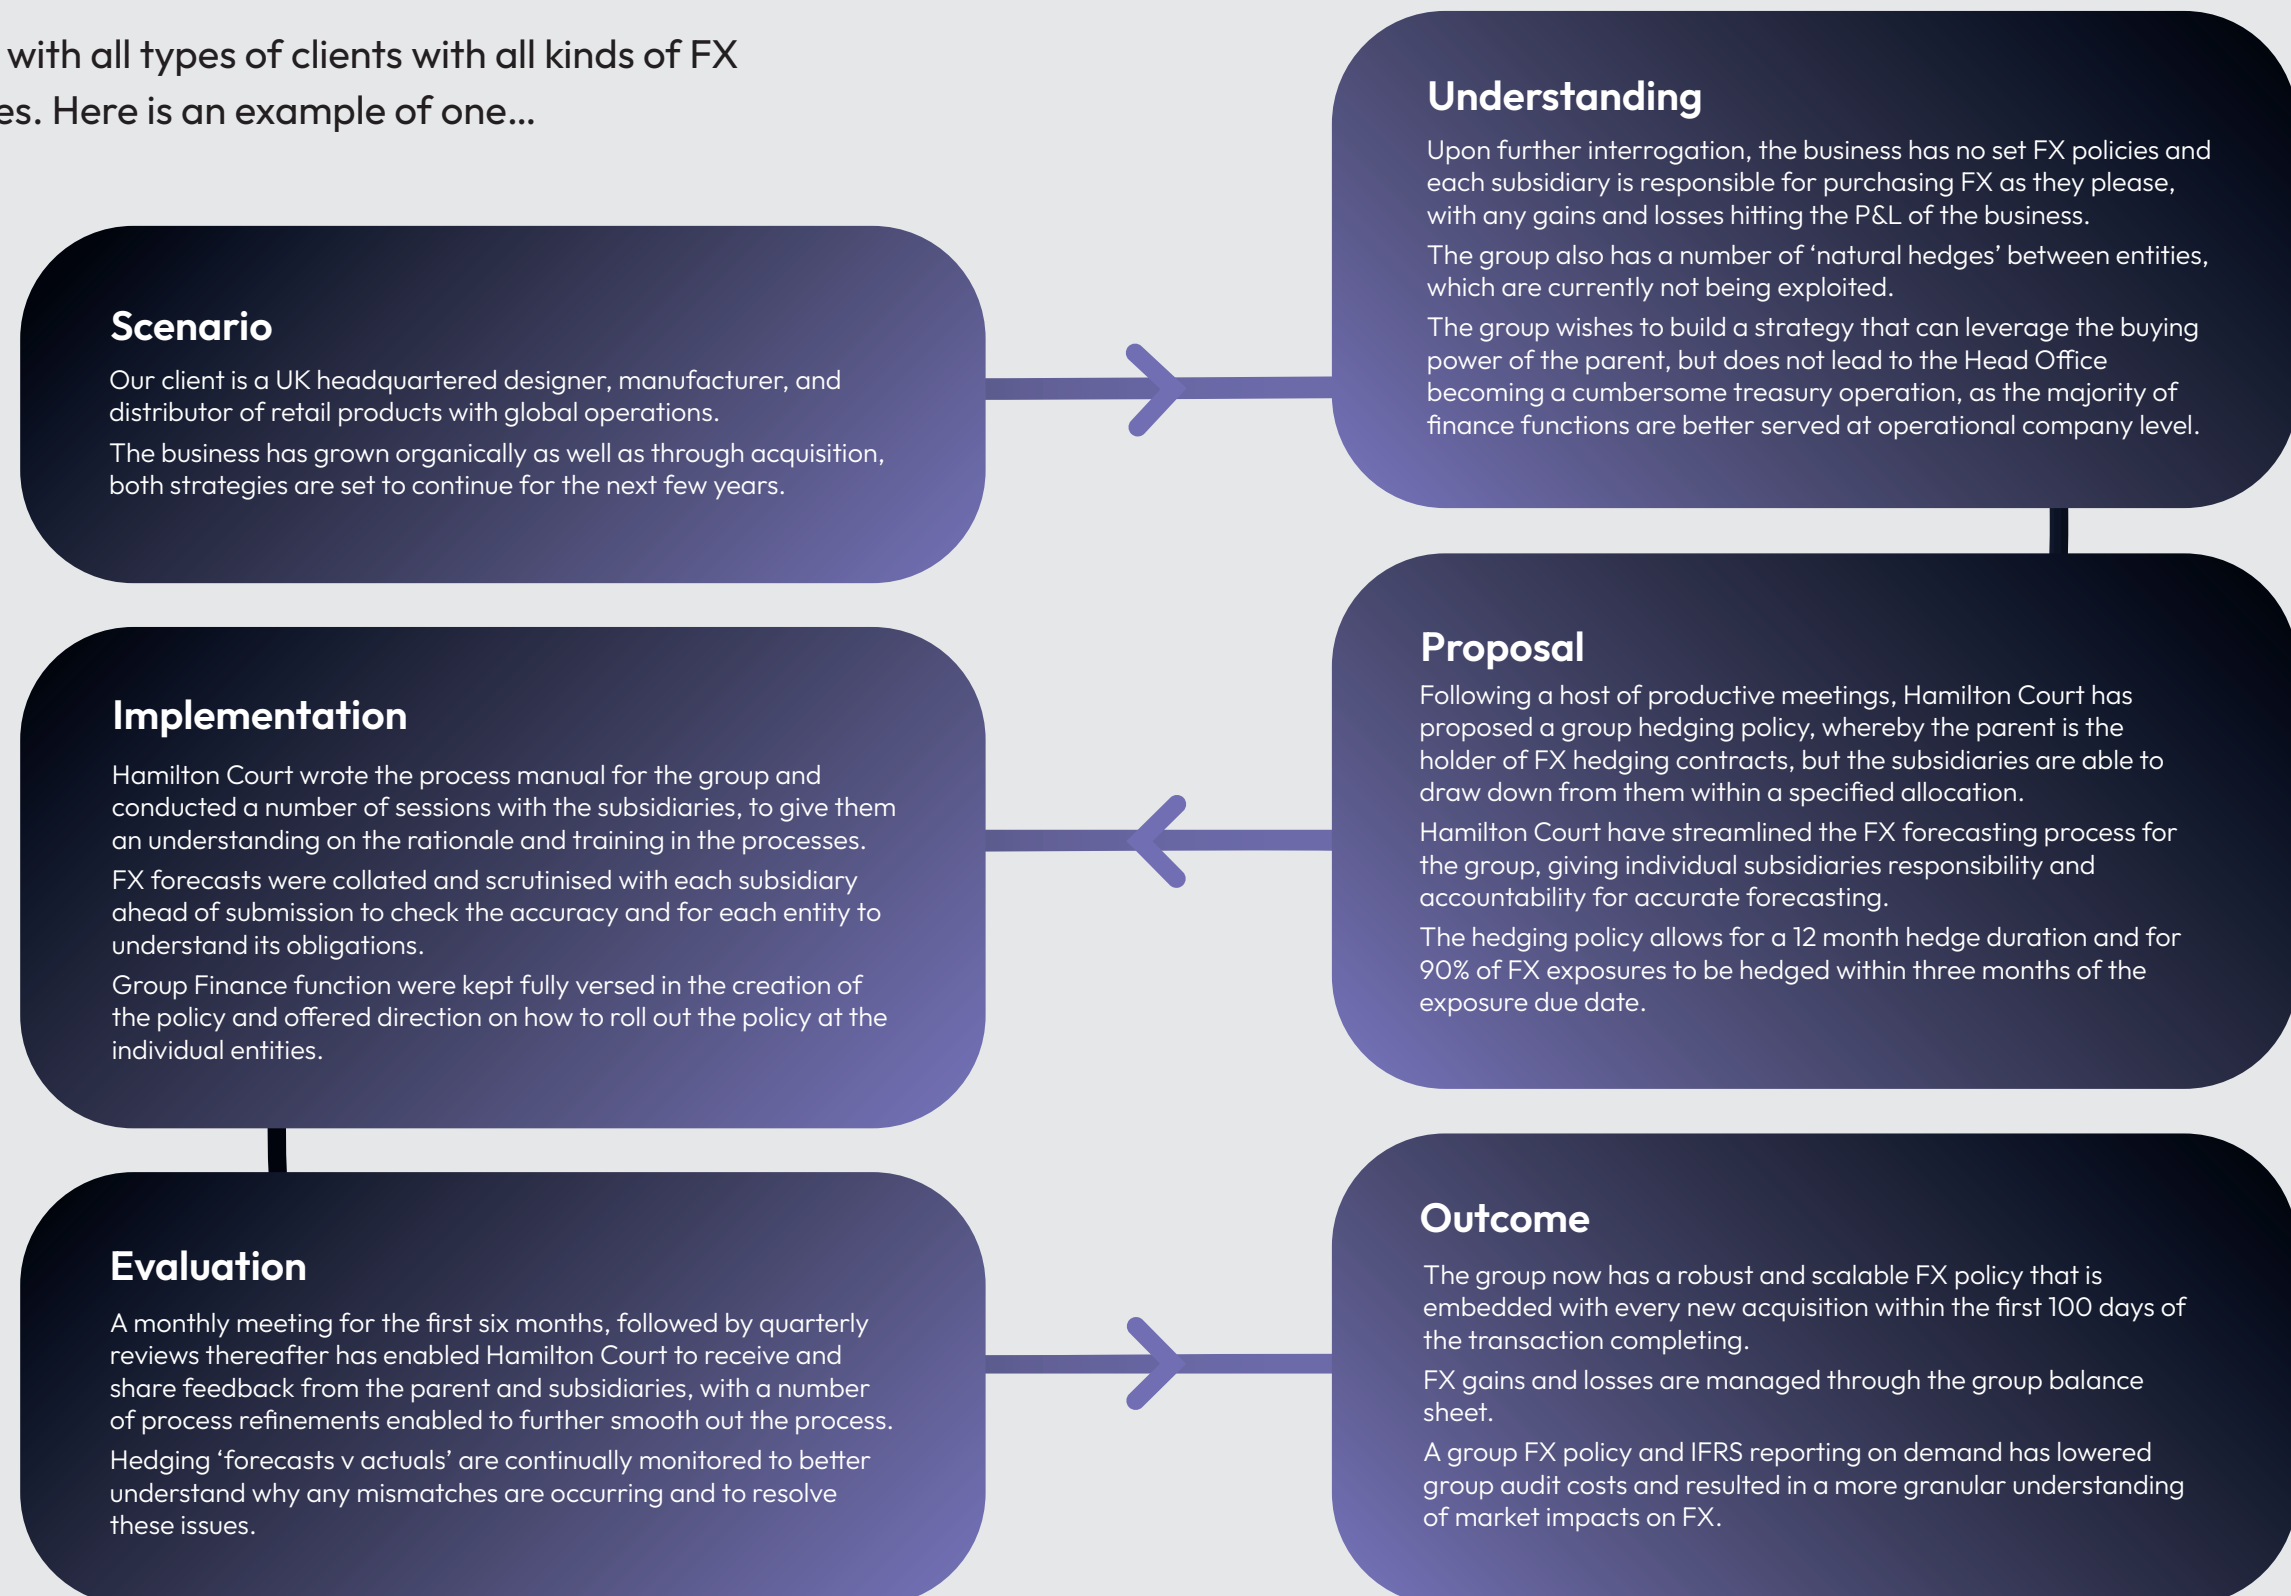

6. OUR CLIENTS

We work with businesses of all shapes and sizes. Foreign exchange can play a major or minor role, for us the process remains the same; identify the risks, work out if and how they should be mitigated, implement the solution, and evaluate the outcome. Whether this takes an hour, a day, a week, or years of refinement, effective risk management pays for itself.

“Before I joined my current company I had never heard of Hamilton Court and I was a tad sceptical that you could add value compared to our relationship with the banks: HSBC, BNP, Barclays, Lloyds and ING, all of whom I have worked with in the past. After nearly 3 months, I have a totally different opinion, your contribution to developing my knowledge and understanding of these complex instruments has been tremendous, your proposed transactions have been first rate at meeting our hedging requirements and transaction execution has been delightfully efficient (something I rarely say).”

CASE STUDY

We work with all types of clients with all kinds of FX challenges. Here is an example of one...
